

#We Are Sterling

Elevating organizational performance excellence.

Lean Six Sigma Yellow Belt Training

The Lean Six Sigma Yellow Belt course is a foundational learning program designed to provide essential core competencies for managing processes. It is also the first of the three Advanced Yellow Belt courses which are prerequisites to enrolling in the highly acclaimed ets Green Belt Certification program.

The following concepts and skills are learned and applied in this full day program:

- Understand the role of measures in process management and how to determine the most effective ones for your process.
- Learn how to flow chart your process so that the best flow and opportunities for improvement can be easily identified.
- Learn two Lean tools which can be applied immediately to reduce waste in the workplace.
- Learn the most important tools for analyzing data and prioritizing problems in a process.
- Understand process variation and how to quantify it.
- Understand the DMAIC method and how to utilize it effectively.

Note: *There are no prerequisites for this course. To achieve Advanced Yellow Belt Certification, Yellow Belt, DMAIC, and Project Management for Six Sigma must be completed within a 12-month period.*

Only \$325 per person

Includes manual and access to the ets Resource Library of digital forms.

Courses are offered in open regional settings throughout Florida and closed formats at the client's location.

96.7% Participant Satisfaction and 100% Completion Rate

"At FP&L, we believe that educating our Executives in the Six Sigma improvement methodology allows leaders to play a critical role in setting the direction for strategic improvement processes within our company enabling FP&L to continue to achieve excellent results for our customers and stakeholders."
